

New Lyme Disease Dashboards Provide County, Town Level Rates And More!

Recent lab studies show that about 60% of the black-legged ticks in many parts of New Hampshire are infected with the bacterium that causes Lyme disease.

Data provided to help reduce risk of infection.

Tick bites and tickborne disease (TBD), most notably Lyme disease, are a growing public health threat in New Hampshire. In response, five dashboards are now available:

- Number of cases over time
- Rates by age and sex
- NH age-adjusted rates over time
- Age-adjusted rates by county
- Town level rates by year

New Hospital Discharge Data Dashboards!

New dashboards show data for NH Hospitals only.

Select SHIP and EPHT areas in WISDOM have new dashboards labeled hospital discharge data. These dashboards have all hospital related indicators currently available in other SHIP dashboards; time trends which show data for NH hospitals only for all years (2000-20015); age-sex breakdowns; and a descriptive area at the top which describes known limitations.

The remaining SHIP dashboards will be

 Heart disease and stroke

Data

Interactive Dashboards

[Heart disease burden](#)

[Stroke burden](#)

Community Profile

[Heart disease and stroke community profile](#)

SHIP areas include Asthma, Diabetes, Heart disease and stroke, Injury prevention, Opioid abuse and Oral health. Environmental Public

updated after out-of-state hospital data is acquired and ICD-10 coding is complete.

Health Tracking (EPHT) areas include Carbon monoxide poisoning and Heat.

New: Download 2000-2009 Hospital Discharge Data

Now you can download HDD data from as far back as 2000 in Tab Separated Value (TSV) format. TSV files are simple text formats for storing data in a tabular structure and are often used when moving data between spreadsheets.

To access, login and click on "My WISDOM" tab.

WISDOM
Connecting NH to Health Data

- Hundreds of health-related indicators
- Customizable reports, charts, and maps
- Easy-to-use web-based application
